Publication No. US20050282749A1
GENERAL INFORMATION
GENERAL INFORMATION
APPLICANT: HENRIKSEN, DENNIS BANG
APPLICANT: HOLST, JENS JUUL
TITLE OF INVENTION: USE OF GLP-2 AND RELATED COMPOUNDS FOR THE TREATMENT,
TITLE OF INVENTION: DISORDERS AND CALCIUM HOMEOSTASIS RELATED SYNDROMES
FILLS REPERENCE: 57736 CIP2 (46865)
CURRENT APPLICATION NUMBER: US/11/035,826
CURRENT FILING DATE: 2005-01-14
PRIOR FILING DATE: 2005-03-20
PRIOR APPLICATION NUMBER: 09/954,304
; OTHER INFORMATION: Disulphide or amide bond between residues 26 and 30 US-11-035-826-193

A;Note: the list of introns may be incomplete
A;Note: gene is located in the major histocompatibility complex, class III region
C;Complex: complement factor B initially forms an inactive complex with complement factor ment factor C3b forming active C3/C5 convertase; Ba is released
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Althway: complement alternate pathway

S. G

the general isoform of beta-spect

```
A.Map position: 2p21-2p21
C.Superfamily: spectrin beta-G chain; alpha-actinin actin-binding domain homology; pleck
C.Superfamily: spectrin binding; cytoskeleton; duplication; heterodimer; membrane protein
F.53-271/Domain: alpha-actinin actin-binding domain homology <ACT>
F.301-412/Domain: appectrin/dystrophin repeat homology <SP1>
F.1697-1803/Domain: spectrin/dystrophin repeat homology <SP2>
F.2196-2305/Domain: pleckstrin repeat homology <PLK>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CyAccession: T0450
